Vista SP1 RC Refresh 2 6001.18000.080118-1840

Standalone Offline Install Package

BT Download

6001.18000.080118-1840 as the RTM version, mainly due to the fact that Vista Service Pack 1 is now officially called only "Service Pack 13, without version number, and the desktop does not carry and plant with "Evaluation Copy" watermark anymore.

However, Microsoft has not officially announced the release of Vista SP1 RTM edition, and the documentation comes together with 6.0.6001.18000 (more detail 6001.18000.080118-1840) build version of SP1 has clearly stated that it's SP1 RC Refresh 2. Whether you want to believe it's the RTM version of Vista SP1, this version has been assumed by many Vista enthusiasts as final RTM copy of Vista SP1, and been used to slipstream to Vista RTM to create integrated Windows Vista Service Pack 1 ISO DVD image with fake 'self assigned' version number such as 6001.18000.080126-2040 and 6001.18000.080131-1830.

It's possible to install Windows Vista SP1 RC Refresh 2 6001.18000 build popularly believed as the final RTM version of Vista SP1 via registry key before official release date, or download the standalone offline setup packages from BitTorrent (BT) network using torrent files below to upgrade the installed Vista RTM in used.
